

tempLED

The better way of lighting.

Our path

2016 - 2020

2020 - 2023

2024/25

- Foundation
- In-house development
- Sales network established
- Cooperation with Jenoptik

- Establishment of our production and logistics
- Expansion of product range

- Expansion of production capacities
- Move to new headquarters
- Internationalization

Our vision

**„We are shaping the future
of industrial lighting in Europe –**

**as a leading manufacturer that sets new standards
through intelligent sensor technology and highest quality.“**

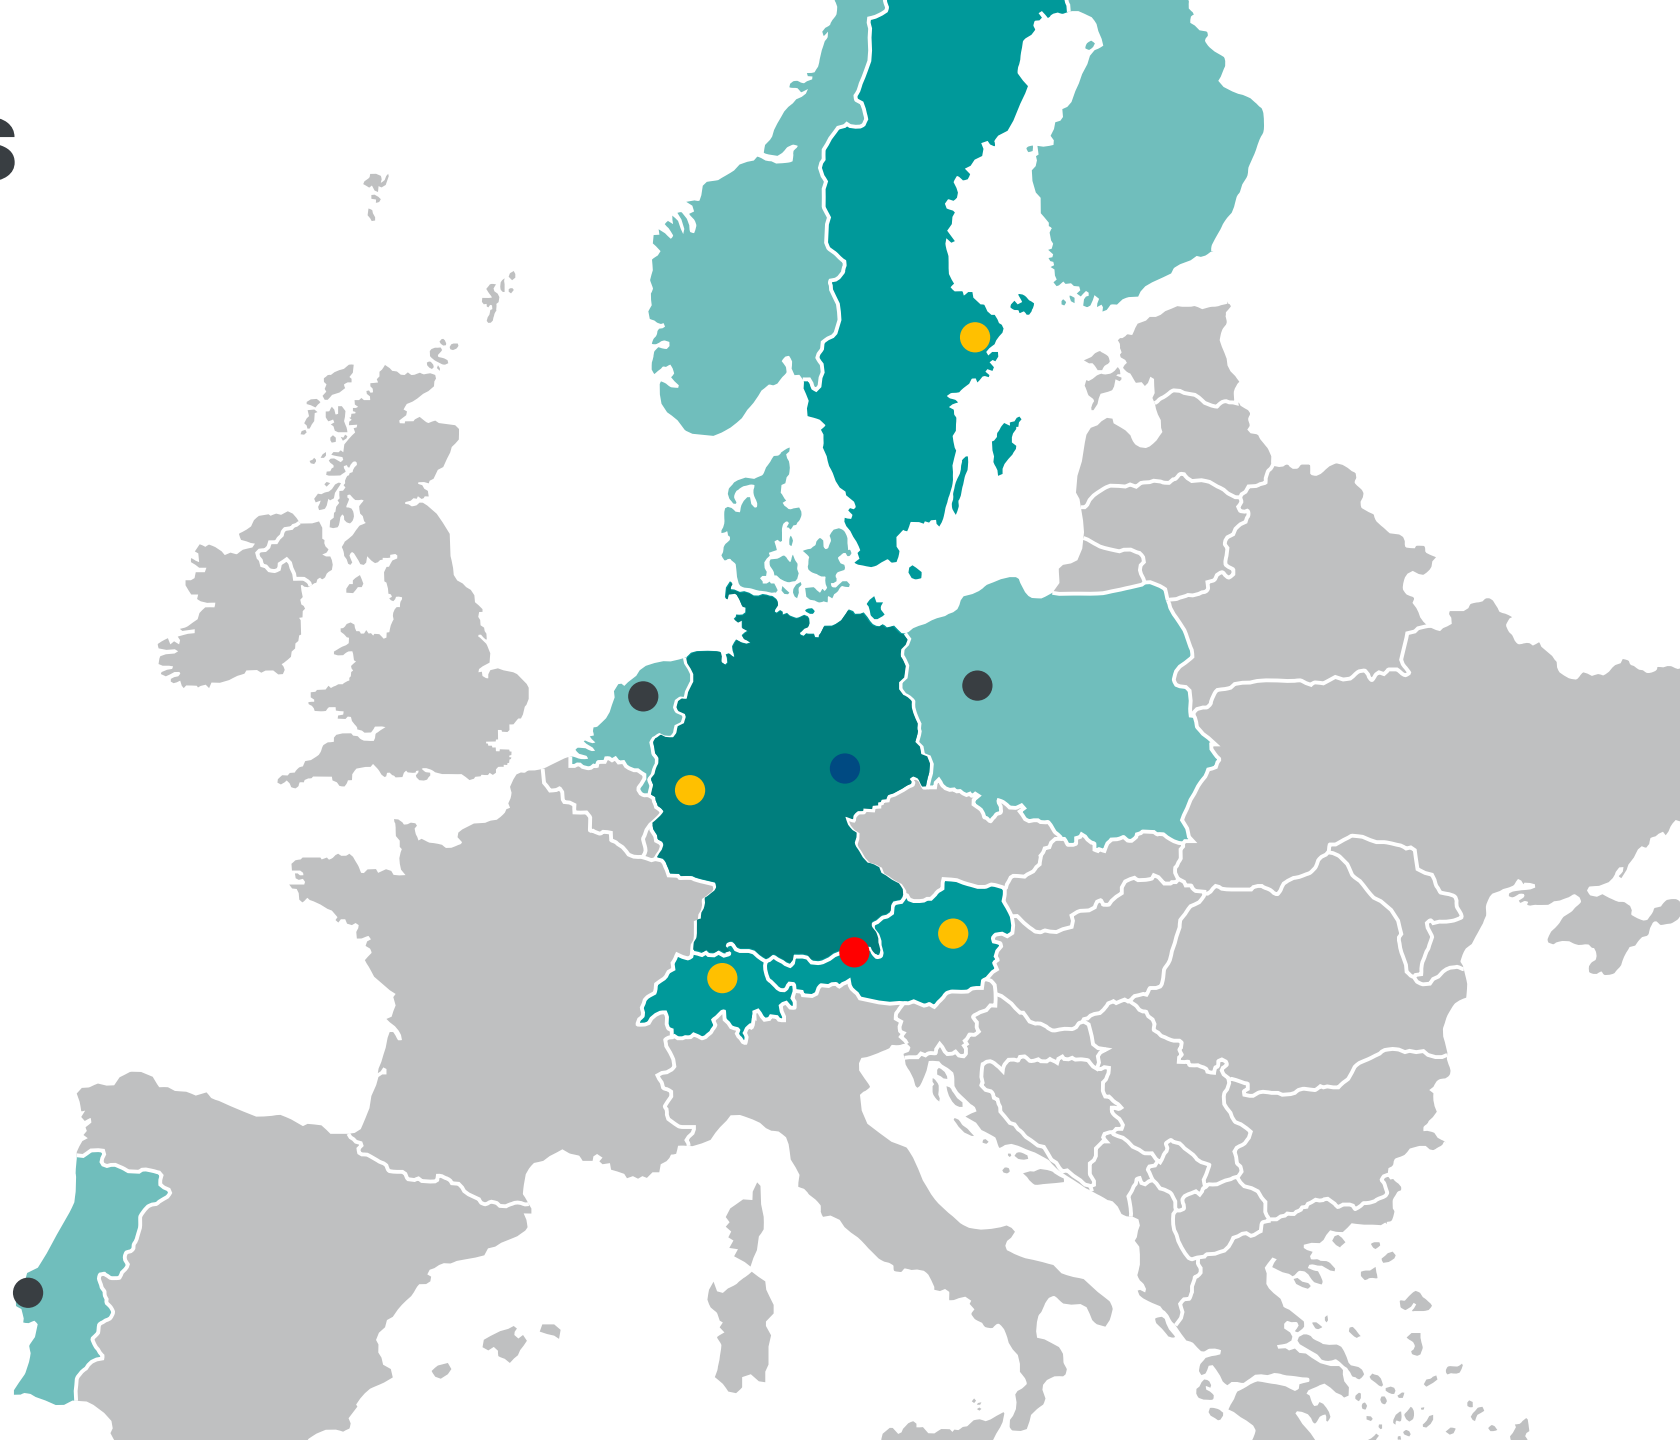

Our mission

**„With technological expertise,
sustainable development,
and cooperative partnerships,**

**we create intelligent lighting solutions that offer our
customers and partners maximum sustainability.“**

Our locations

- Headquarter
- Production
- tempLED Sales Offices
- Distribution Partners

Our Headquarter

Kiefersfelden

Our production

We care about sustainable solutions

Modularity **01**

Instead of replacing entire luminaires, components can be upgraded or replaced. Waste is reduced and service life is extended. This enables us to offer solutions that are environmentally friendly and future-proof.

LED Technology **03**

By using innovative technologies such as state-of-the-art LEDs and intelligent sensor technology, we are drastically reducing energy consumption. This not only lowers costs but also CO2 emissions.

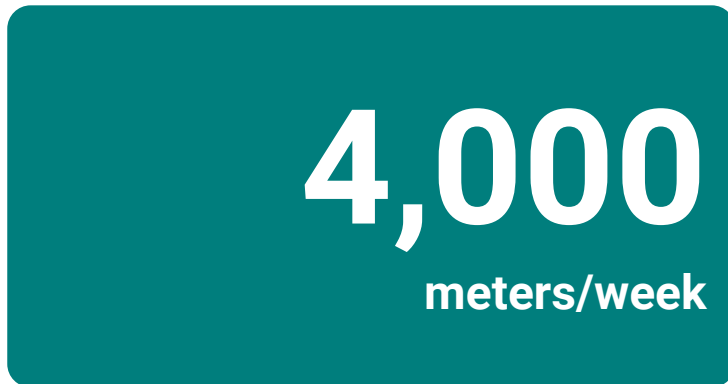

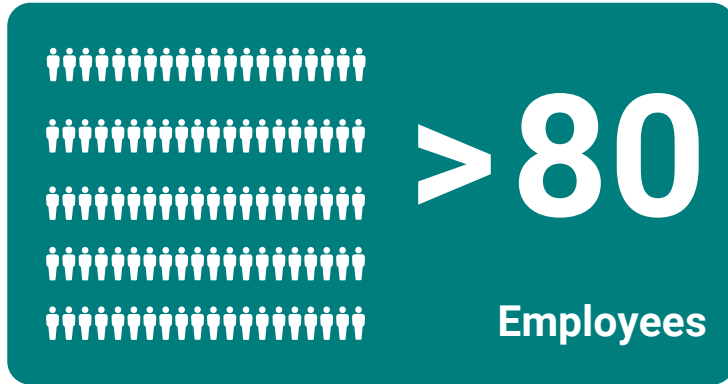

Longevity **02**

Thanks to the use of robust materials and advanced technologies, our lights last significantly longer, which reduces the need for replacement parts. This reduces resource consumption, enabling us to make an active contribution to protecting the environment.

Recycling & Reuse **04**

We take back your old products free of charge and ensure a full recycling process.

Mobility

Why tempLED?

We offer full service

1

Initial review

2

Lighting design

3

Production

4

Logistics

5

Installation & Service

6

Final inspection

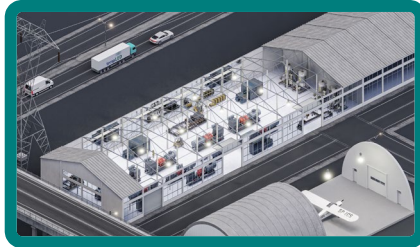

We are digital

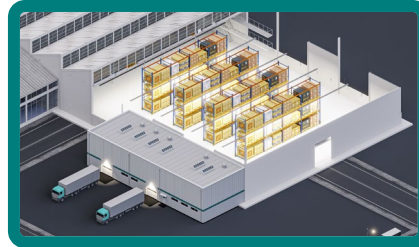

Digital processes – From start to finish

We rely on seamless interfaces. Thanks to fully digital processes, from the configurator to lighting design and initial review right through to digital monitoring of your lighting systems.

Our expertise

Hall lighting

Quick installation systems

Lighting for high temperatures

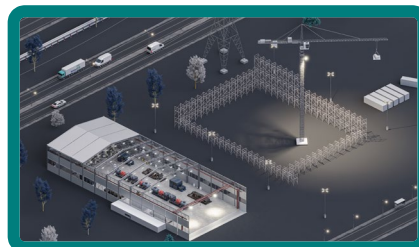

Outdoor lighting

Emergency lighting

Flood light systems

Multi functional lighting

Office lighting

Tri-proof lighting

Cleanroom lighting

Over 1,000,000 lights are currently shining in more than 10 countries.

Day after day.
